West Virginia people some years ago wanted us to go up to Morgantown, Fairmont and Clarksburg near the head of the Monongahela river. We told them that if they would come down to the line we would mest them there. They made a strong effort and raised some money but the B. & O., in the meantime, built from Fairmont to Morgantown and the desire for the other road died. However, we shall go up there some day." shall go up there some day.

/ UCH of the chafing of children under the joints where the skir V lies in folds is due to the use of Soap containing too much alkali. In the IVORY SOAP there is no excess of alkali, so it can be used in the nursery with the most satisfactory results. When applying it, rub a wet cloth upon the Soap, then wash tenderly, but thoroughly, and rinse perfectly, especially the folds of flesh, with clear water, and dry with equal care. Prof. Leeds, of the Stevens' Institute of Technology, says: "The IVORY SOAP, while strongly cleansing, leaves the skin soft and pleasant to the touch."

A WORD OF WARNING.

There are many white soaps, each represented to be "just as good as the 'lvory';" they ARE NOT, but like all counterfeits, lack the peculiar and remarkable qualities of the genuine. Ask for "Ivory" Soap and insist upon getting it. Copyright 1886, by Procter & Gamble
